Dear Parent, Guardian, Staff Member:

In compliance with the Asbestos Hazard Emergency Response Act (AHERA) of 1986, this is to notify you that St. Dominic Academy has an approved Management Plan relating to the identification and location of asbestos containing materials. These plans are on file in the school business office and are available for your inspection.

The most recent surveillance and inspection was conducted in August, 2018 by a certified inspector from Detail Associates, Inc. Maintenance of asbestos-containing materials is an ongoing program at this school.

At the current time, all asbestos materials in the school are intact and in good condition. If you have any questions, or need additional information, please do not hesitate to contact me.
